Re: Outstanding Issues Standard Chlorine Site

Dear Karl:

As per our previous conversations regarding Standard Chlorine, EPA is concerned with a few outstanding issues. The following are our concerns.

1. EPA does not have an updated schedule that addresses the submission of the remedial investigation/feasibility study documents. EPA would like the date that the RP's will be submitting these documents. In specific, the date of submittal of the Draft Remedial Investigation, Final Remedial Investigation, Draft feasibility Study and Final Feasibility Study. Please be advised that EPA will need sufficient time for adequate review of the draft documents.
2. EPA would also like the RP's to provide a date when the endangerment assessment scoping meeting will take place. It is imperative that the EPA and other Federal Agencies are present to provide comments on the assessment. This will avoid any confusion that may exist between EPA, DNREC and the RP's on what the endangerment assessment needs to address.

EPA would appreciate DNREC taking these issues into consideration in the very near future.

If you should have any questions regarding this matter, please contact me.
